

HumanDust

HumanDust Manifesto

Why

Every crypto wallet accumulates tiny fractions — *dust*. Individually useless; collectively a dormant resource. **HumanDust** aims to **pool these dusts** into a **useful common flow**.

Vision

Turn what is worthless to the individual into a **collective engine for impact** (environment, education, open-source, solidarity), with open and transparent governance.

Principles

Openness: no proprietary lock-in; public specs; free reuse.

Simplicity (frugal tech): minimize energy footprint and fees.

Transparency: clear rules, public accounts, auditability (on-chain where relevant).

Neutrality: no partisan, commercial, or influence-driven promotion.

What HumanDust is not

Not a company, not a foundation, **no speculative token**.

No fundraising or personal-data collection via the site; newsletter is opt-in only.

HumanDust

Open implementation paths

“Recycle my dust” button (open-source widget for wallets/dApps): detect, aggregate, route to the common vault on the right chain with minimized fees (configurable threshold, fee preview, read-only mode).

\$HDST utility token (non-speculative by design): a **contribution counter** that records each participant’s share; *soul-bound* option, **verifiable credentials**, **public dashboard**.

Impact micro-funding: periodic allocation (public voting) to measurable causes; **published KPIs**, partner audits, quarterly reports.

Governance & current status

Status: reflection & documentation phase; **seeking volunteers/associations** to carry it forward.

Domain transfer of *humandust.org* is possible to a motivated, legitimate, transparent team.

Open governance to be defined (multisig, DAO, association).

Call for collaboration

HumanDust is an **open idea born in Switzerland (2025)**; reuse it, improve it, fork it.

Crypto builders, NGOs, open-source communities: **propose, audit, experiment — every grain counts**.

TL;DR: Pool *dusts* into a **common flow** for impact, under **open governance, non-speculative, freely reusable**.

HumanDust

Disclaimer

HumanDust is neither a commercial project nor a fundraising initiative.

It is a free and open concept, intended solely to inspire and encourage collective reflection.

This website does not collect or process any personal data, nor does it receive or manage any financial contributions.

Its sole purpose is to provide information and share ideas.
